Dear Sir/Madam,

My name is Alaa Mezni. Newly graduate from Faculty of Law Economics and Management Of Jendouba. I am specialized in Computer Science and Management. I got my degree with top honors.

I am very interested in the software development industry, especially the development of websites / applications. I have gained a solid knowledge in software programming with C and Java. I have also experimented the power of Artificial Intelligence and it's impact in today's world through the project that I created in my Bachelor's Degree final year : It is a chatbot or a virtual assistant that helps new programmers during the process of learning a new programming language. I worked the most on creating the frontend part of several websites, and a bit on the backend part.

Therefore, I would like to work for your esteemed company in any vacancies related to Web Development. As I am from an Arab mother tongue background, excellent in French and English and a basic knowledge in German, my level of communication with the local and international clients would be so pleasing. Also i am polyvalent and flexible. Moreover, I like working in teams : I joined trainings to learn about leadership, communication skills and management, and I got the ability to adapt easily with any work conditions.

Please have a look on my CV for additionnal informations. Thank you for your time and considerarion and i am looking forward to hearing from you.

Best regards

Alaa mezni
